

May 2, 2022

Dear Maplewood Residents and Family members,

A few weeks ago, we sent out notice about Residents in long-term care home being offered the fourth dose of COVID- 19 vaccines in British Columbia. During this time, we have also been seeking consents from the resident or substitute decision makers and received orders from the Resident's physicians.

Fraser Health immunization team will be onsite tomorrow, Tuesday, May 3rd, 2022, to administer immunizations to those who consented and are able to receive the vaccine at this time. Moderna and/or Pfizer doses, depending on availability will be brought by the immunization team in the morning.

Any Residents who currently have COVID or are recovering will be receiving their dose in three months time.

For general information about COVID-19 vaccines, please visit the BCCDC website.

If you have any questions, please feel free to reach out to khomfeld@maplewood.bc.ca / 604-870-7560.
